As an inquisitive and enthusiastic young mind, I chose to pursue an education in the field of engineering after my high school graduation. The knowledge so acquired in the four years of formal education is highly valuable. As I laid down my options for further studies, I thoroughly analyzed where my true interests lie. Hence, I chose to pursue a Master's in the field of apparel design. Today, as I learn and progress, I constantly make an effort to understand and explore the endless possibilities of utilizing both the technical and creative knowledge.
